

BUTTON ATTACHMENT AND SECURITY SPECIALISTS SINCE 1994

MK 18/18S

Automatic button shank wrapping machine

HIGH SPEED LARGE VOLUME

- **Thread saving - revolutionary design to reduce thread waste**
= Up to 20% extra buttons per cone over any other button wrapping machine
- **Automatic waste extraction**
= Less downtime due to cleaning and maintenance
- **Unique high speed threading of machine**
= Simple and fast change of colours
- **App control - Android and iOS**
= User friendly machine control from a mobile phone or tablet pc

MMS Controller APP

An exciting innovation in industrial button attachment technology! Provides a sleek modern user interface and control mechanism for our button wrapping machines. Allows the operator to select program, alter number of wraps, adjust seal time, lock variables etc. and access the diagnostics system.

Available in two versions

- MK 18S - Standard version of the machine which is perfect for most standard button shank wrapping applications. Lean design ensures that this is the ultimate standard wrapping machine
- MK 18 - Universal machine that incorporates a button holding mechanism so that long shanks and shank buttons can be wrapped.

TF Thread

MMS TF Button Shank Wrapping Thread

One of the most visible and obvious areas of quality on a garment is the button attachment. If a button falls off the garment is compromised as is the image of the brand. Conventional sewing thread solutions for button security are messy and unreliable and do not prevent buttons from falling off. The MMS button securing system has been designed and developed over 20 years to provide the finest solution for ensuring that buttons will not fall off a garment.

22g and 220g cones

MMS TF thread the ideal partner to the MMS range of machines for button security on every garment from shirt to raincoat.

- The highest quality components guarantee button security which enhances the garment
- Highly elastic core ensures maximum gripping force on the shank
- Fusible component ensures maximum button security with no loose ends
- Manufactured to be 100% consistent to ensure a perfect shank appearance with soft finish
- Tested and proven to withstand the rigours facing every type of button attachment over the lifetime of the garment
- Colour fast to washing, dry cleaning, perspiration
- Certified by Oeko-Tex and complies with all other relevant standards

MMS TF thread is proven and specified by major brands worldwide.
